

RESET KEYCHAIN PASSWORD

APPLICATIONS > UTILITIES

1)

LOREM IPSUM DOLOR

MAECENAS PULVINAR SAGITTIS ENIM

2)

Keychain Access

Keychain Access File Edit

3) About Keychain Access

Preferences... ⌘,

Keychain First Aid ⌘⌘A

Certificate Assistant ▶

Ticket Viewer ⌘⌘K

4)

Show keychain status in menu bar

Search directory services for certificates

Reset My Default Keychain

Reverts to factory defaults and
Your current default keychain

5)

Please enter your login password. This password will be used to create your new keychain.

Password:

Show password

Cancel

OK

5. Enter the users current network password (the one that they use to login to the computer when properly attached to a network cable)

If this password does not match the login password the computer will tell you there is a login keychain error

1. Go to Finder > Applications > Utilities
2. Double Click on Keychain Access
3. In the top menu bar click on Keychain Access and then Preferences
4. Click on Reset My Default Keychain
