

How to watch Safari Montage on your Mac products

1. Using your Safari browser, go to:
<http://www.safarimontage.com/support/smmpdownload.aspx>
2. Select Agree and you will proceed to the next page.
3. Choose the bottom selection:

4. In the top right corner is your download box. This will show the progress as your media player is downloading. If your download box does not appear on its own, click on this download box and it will open your downloads. From there you will need to double click on your orange media player box to begin the download.

- 5.
6. Then select continue, continue, continue, accept, and continue and install to proceed with the download.
7. Then restart the Safari browser and go to the Safari Montage website at:
<http://safari.int.mckinneyisd.net/SAFARI/montage/login/login.php>
This is an internal server so you will need to be on a MISD campus to access this. Will not work from home☹
8. You should now be able to logon with your id and view videos on your mac products.
